## Baxter N. Knox Attorney-at-Law

HOUSTON, MISSISSIPPI

A Watch to be properly repaired and cleaned, must be entirely taken to pieces, each part separately cleaned and inspected, and these parts reassembled. It must then be carefully adjusted and timed. All this is delicate work and requires experience and great mechaincal ability.

There is a right and a wrong way to do everything. We might point out dozens of things in the matter of watch repairing that we think we do a little better than the ordinary, but the best assurance to our customers of first-class work is our guarantee that all repair work will be satisfactory. Bring us your watch to repair. The work will be properly done and our charge will be reasonable.
